# UPPALAPATI SOMYA SRI

9030721396 | uppalapatisomyasri@gmail.com | linkedin.com/in/uppalapati-somyasri-3b797831b | github.com/Somyasri1

## Professional Summary

Computer Science and Engineering undergraduate with hands-on experience in software development through an internship and academic projects. Worked with JavaScript, React.js, Node.js, Express.js, MongoDB, Firebase Firestore, REST APIs, and JWT authentication. Built web applications with database integration, role-based access control, and user authentication.

## Education

**Vishnu Institute of Technology, Bhimavaram, Andhra Pradesh** *2023 – 2027*
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.66

**Narayana Junior College, Bhimavaram, Andhra Pradesh** *2021 – 2023*
Intermediate (MPC) — Percentage: 79.7%

## Technical Skills

| | |
|---|---|
| **Languages:** | Python, C, JavaScript |
| **Frontend:** | HTML5, CSS3, React.js, Responsive Web Design |
| **Backend:** | Node.js, Express.js, REST APIs, JWT Authentication |
| **Databases:** | MongoDB, Mongoose, Firebase Firestore |
| **Developer Tools:** | Git, GitHub, Postman, VS Code, Firebase |

## Experience

**Full Stack Developer (MERN Stack) Intern** *May 2026 – Jul 2026*
*SmartBridge Educational Services Pvt. Ltd. — in collaboration with Andhra Pradesh State Council of Higher Education*

- Completed a 120-hour MERN Stack virtual internship with hands-on project experience in MongoDB, Express.js, React.js, and Node.js.
- Contributed to the development of a healthcare appointment management application supporting 3 user roles (Admin, Doctor, and Patient) by implementing backend functionality, REST APIs, and MongoDB integration.

## Projects

**Book A Doctor** | **React.js, Node.js, Express.js, MongoDB, JWT, Mongoose** *Jun 2026 – Jul 2026*
*GitHub:* github.com/Somyasri1/Book-A-Doctor

- Collaborated in a team to develop a MERN-based healthcare appointment management platform with three user roles (Patient, Doctor, and Admin) and four MongoDB data models.
- Built backend components using the MVC architecture by creating models, controllers, routes, and MongoDB schemas for core application features.
- Secured user authentication using JWT and bcrypt password hashing to protect application access and user accounts.

**Sports Scheduler** | **Node.js, Express.js, Firebase, JavaScript** *Mar 2025 – Apr 2025*
*GitHub:* github.com/Somyasri1/sports-scheduler

- Developed a web application for sports team management, match scheduling, and event planning using HTML, CSS, and JavaScript.
- Integrated Firebase Firestore to store and retrieve sports session and user information for efficient data management.
- Built separate Admin and Player dashboards with role-specific functionality for sports session and event management.

## Certifications & Achievements

- Full Stack Web Application Development with Node.js — Vishnu Institute of Technology
- MongoDB Developer's Toolkit — GeeksforGeeks
- Cybersecurity Virtual Internship — EduSkills & Palo Alto Networks
- Competitions & Hackathons: Flipkart Runway Season 5, GenAI & Agentic Intelligence Innovation Hackathon, Women Who Master Hackathon, Nation Building Case Study, Failthon
